Tukio Student Event Preferences

Google Form template · 11 questions · about 3–4 minutes · anonymous

This template lays out every question, answer option and Google Forms setting for the survey that collects real DeKUT student preferences for evaluating the Tukio recommender. Each question notes which part of the app or benchmark its answer feeds (**Maps to**), so the responses can be imported directly as a real-student ground truth.

How to build it in Google Forms

1	Create a blank form at **forms.google.com**. Title: *Tukio – Campus Events Survey*.
2	Settings → Responses: **turn OFF "Collect email addresses"** and leave "Limit to 1 response" off (it requires sign-in, which removes anonymity).
3	Add the four sections below with **Add section** (the icon with two bars) so students see short pages.
4	Create each question with the **Google Forms type** shown on its card, mark it Required as noted, and add response validation where the card says so (three-dot menu on the question → Response validation).
5	For the two event grids, open the question's three-dot menu → **Shuffle row order**; for checkbox questions, three-dot menu → **Shuffle option order**.
6	Preview, time yourself, then pilot with 3–4 friends. Cut anything that pushes it past 4 minutes.
7	Responses → link to Google Sheets, then File → Download → CSV (for importing into the benchmark).

Before sending: confirm with your supervisor whether ethics approval is needed. In the write-up, describe this data as *stated intention* (what students say they would attend), not observed attendance. Aim for 60+ responses: 16 event answers × 60 students ≈ 960 labelled answers.

Section 1 of 4 · Consent

Section description (paste into the form): This short survey (about 3 minutes) helps a DeKUT final-year project build better campus event recommendations. It is anonymous: we do not collect names or emails, and answers are only used in aggregate.

1 **Do you agree to take part?** — CHECKBOXES

□ I agree that my anonymous answers may be used for a DeKUT final-year project on campus event recommendations.

Required · Response validation: at least 1 selected · Maps to: consent filter (rows without it are dropped)

Section 2 of 4 · About you

2 **Which school are you in?** — DROPDOWN

Options match the app's registration list. Check them against DeKUT's official list of schools and adjust both the form and the app if they differ.

- ○ School of Computer Science & IT
- ○ School of Business
- ○ Health Sciences
- ○ School of Engineering
- ○ School of Science & Applied Tech
- ○ Other

Required · Maps to: user **department** (the hybrid's department-match signal)

3 **Year of study** — MULTIPLE CHOICE

- ○ 1st year
- ○ 2nd year
- ○ 3rd year
- ○ 4th year
- ○ 5th year
- ○ Postgraduate

Required · Maps to: cohort analysis (do first-years behave differently?)

Section 3 of 4 · Interests and habits

4 **Which kinds of campus events interest you?** — CHECKBOXES

- □ Tech
- □ Academic
- □ Career
- □ Social
- □ Sports
- □ Workshops
- □ Cultural

Required · Validation: select at least 3 (same rule as the app's onboarding) · Maps to: **interest categories** (UserInterest)

5 **Pick up to 5 specific topics you care about most** — CHECKBOXES

- □ Python
- □ AI
- □ Data science
- □ Cybersecurity
- □ Web development
- □ Mobile apps
- □ Research
- □ Seminars
- □ Mathematics
- □ Internships
- □ Entrepreneurship
- □ Startups
- □ Mentorship
- □ Football
- □ Fitness
- □ Basketball
- □ Music
- □ Dance
- □ Film
- □ Theatre
- □ Networking
- □ Games
- □ Hands-on training
- □ Certifications

Required · Validation: select at most 5 · Shuffle option order · Maps to: **interest tags** (UserInterest), the text the TF-IDF and rule-based models match against

6 **About how many campus events do you attend in a month?** — MULTIPLE CHOICE

- ○ 0
- ○ 1–2
- ○ 3–5
- ○ 6 or more

Required · Maps to: light vs heavy users (the benchmark's cold-start and warm cohorts)

7 **When are you usually free for events?** — CHECKBOX GRID

	Morning	Afternoon	Evening
Weekdays	□	□	□
Weekends	□	□	□

Optional (rows not required) · Maps to: tests the **timing / urgency** signal

8 **What usually makes you decide to go to an event?** CHECKBOXES

- □ The topic itself
- □ It's popular / lots of people going
- □ Certificate
- □ It's close to my classes
- □ Friends are going
- □ Career or CV benefit
- □ Free food

Required · Shuffle option order · Maps to: tests the **popularity** signal ("popular", "friends") and the **department** signal ("close to my classes")

9 **Would you attend an event organised by a different school or faculty?** MULTIPLE CHOICE

○ Often ○ Sometimes ○ Rarely

Required · Maps to: **the key defense question**: the evaluation found the hybrid beats TF-IDF only if students favour their own department's events

Section 4 of 4 · Would you attend?

Section description (paste into the form): Imagine each event is happening this week. Would you go? There are no right answers; go with your first instinct.

10 **Would you attend these events? (part 1 of 2)** MULTIPLE CHOICE GRID

	Definitely	Maybe	No
DeKUT Hackathon 2026 · Sat 09:00 · Innovation Hub	○	○	○
AI & Ethics Panel · Wed 16:00 · Library Auditorium	○	○	○
Python for Beginners · Tue 14:00 · Computer Lab 3	○	○	○
Cybersecurity Essentials · Thu 17:00 · Online (Zoom)	○	○	○
Research Methods Seminar · Mon 10:00 · Lecture Theatre 1	○	○	○
Journal Club: AI in Medicine · Fri 18:00 · Science Lab	○	○	○
Mock Interview Day · Wed 09:00 · Business Incubator	○	○	○
Tech Internship Fair · Thu 11:00 · Main Hall	○	○	○

Required: turn on "Require a response in each row" · Shuffle row order · Maps to: **labels**: Definitely = positive (like an RSVP), Maybe = weak positive (like Interested), No = negative (like Not for me)

11 Would you attend these events? (part 2 of 2)

MULTIPLE CHOICE GRID

	Definitely	Maybe	No
Entrepreneurship Bootcamp · Sat 10:00 · Business Incubator	○	○	○
Inter-Faculty Football Tournament · Sat 14:00 · Open Grounds	○	○	○
Campus Marathon 2026 · Sun 07:00 · Sports Complex	○	○	○
DeKUT Music Fest · Fri 19:00 · Open Grounds	○	○	○
Poetry Slam Night · Thu 18:30 · Arts Studio	○	○	○
Freshers' Welcome Mixer · Fri 17:00 · Student Centre	○	○	○
Board Games Afternoon · Sun 15:00 · Cafeteria Courtyard	○	○	○
Web Development Bootcamp · Sat 13:00 · Computer Lab 3	○	○	○

Same settings and mapping as question 10

+ An event you wish existed on campus (optional)

SHORT ANSWER

_____

Optional · Not used by the model: good quotes for the report

Why these 16 events

Category	Events in the grids	Count
Tech	Hackathon, AI & Ethics Panel	2
Workshop	Python for Beginners, Cybersecurity Essentials, Web Development Bootcamp	3
Academic	Research Methods Seminar, Journal Club: AI in Medicine	2
Career	Mock Interview Day, Tech Internship Fair, Entrepreneurship Bootcamp	3
Sports	Inter-Faculty Football Tournament, Campus Marathon	2
Cultural	DeKUT Music Fest, Poetry Slam Night	2
Social	Freshers' Welcome Mixer, Board Games Afternoon	2

All 16 are events from the app's seed catalogue, 2–3 per category. Two mix categories on purpose (Tech Internship Fair = Career + Tech; Journal Club: AI in Medicine = Academic + Tech), and Python for Beginners / Web Development Bootcamp are a near-duplicate pair. These show whether a model can tell related events apart rather than only matching category names. Days and times are spread across weekdays, weekends, mornings and evenings so question 7 can be checked against the answers here.

How responses map into the benchmark

Form question	Spreadsheet column	Becomes in Tukio / evaluate.py
1 Consent	Do you agree to take part?	Rows without consent are dropped
2 School	Which school are you in?	User.department
3 Year	Year of study	Cohort for analysis
4 Categories	Which kinds of campus events…	UserInterest tags (category names)
5 Topics	Pick up to 5 specific topics…	UserInterest tags (lower-cased)
6 Frequency	About how many campus events…	Light vs heavy user cohort
7–9 Habits	Free times / Decide to go / Other school	Evidence for timing, popularity, department signals
10–11 Grids	One column per event row	Definitely = positive · Maybe = weak positive · No = negative

Evaluating with it: for each student, give a model their school and interests plus a share of their 16 answers, and ask it to rank the rest. Score with the same metrics as the existing benchmark (P@5, NDCG@10, MRR, catalog coverage) and report it as a fourth ground truth in docs/evaluation.md, labelled as stated intention.

Keep the event rows exactly as written (title first, then " · day time · venue"). The planned import script will match each grid column to a seeded event by its title, so renaming a row in the form means updating the import too.
